how to start and stay on the eating plan as well as a week of menus and some recipes The menus and recipes are given for two levels of daily sodium consumption 2 300 and 1 500 milligrams per day Twenty three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program It is also the highest amount recommended for healthy Americans by the 2005 U S Dietary Guidelines for Americans The 1 500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve The lower your salt intake is the lower your blood pressure Studies have found that the DASH menus containing 2 300 milligrams of sodium can lower blood pressure and that an even lower level of sodium 1 500 milligrams can further reduce blood pressure All the menus are lower in sodium than what adults in the United States currently eat about 4 200 milligrams per day in men and 3 300 milligrams per day in women Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake
