$$\frac{2}{3} \times \frac{5}{1} = \frac{10}{3}$$

Directions:
Find the product of the following.

1) $\frac{1}{6} \times 3$

2) $\frac{4}{7} \times 5$

3) $\frac{2}{3} \times \frac{1}{2}$

4) $\frac{8}{9} \times \frac{3}{5}$

SOLUTIONS:

Fractions Pack 4 R. M. Mair,2017-11-18 Multiplying fractions by whole numbers whole number answers Multiplying fractions by whole numbers mixed number answers Multiplying fractions by fractions Converting mixed numbers to improper fractions Multiplying mixed numbers by whole numbers Multiplying mixed numbers by fractions Multiplying mixed numbers by mixed numbers Ordering fractions basic colouring exercise All mathematical progress is heavily dependent on a pupil's numerical ability The best way to improve children's number work is for them to practice it preferably on a regular basis Unfortunately number work is in itself not very interesting You can try and make it more acceptable by relating it to real life but this does not work too well with younger pupils As such the best way of getting pupils to practise their number work is to connect it to something that they find enjoyable The worksheets in this pack come in pairs Each different pair of sheets is a small conceptual step in the learning of fractions The first sheet in each pair is a question sheet The second sheet in each pair is a dot to dot puzzle Pupils are given the question sheet Having been taught how to calculate the answers on the question sheet the pupils are asked to do the questions Next the pupils are given the dot to dot puzzle Finding the first answer from the question sheet on the dot to dot puzzle the children proceed to join up the answers from the question sheet in order This should make a recognisable picture in each case A significant advantage in this process for the teacher is a reduction in the amount of marking the picture being an answer for anything up to 44 questions Therefore these sheets are self marking the pupils gaining almost instant feedback from whether the picture is right or wrong The end product not only reinforces the pupils learning of different concepts but also produces some great display work These worksheets have been designed for use with pupils in the age range of 9 to 13 years of age depending on ability with as little reading as possible so that poor readers are not discouraged from tackling the problems **Number and Operations with Fractions Levelled**
