## The Sense of Grammar Michael Shapiro, 1983

*The Speaking Self* Michael Shapiro, 2012 This book is not a usage manual in the conventional sense It is a sui generis series of compact self-contained essays arranged into chapters by broad topic categories of problematic points of linguistic usage in contemporary American speech and writing and cast in an uncompromisingly analytical style that is nevertheless accessible to any educated reader with a love of words an inquisitiveness about language and an appetite for exegesis The bias of the author is unabashedly prescriptivist It is formed by a long-standing theoretical interest in and empirical observation of English usage oral and written Much of the material for analysis is drawn from the language of contemporary media both print and broadcast The discussion of examples frequently opens out on a perspective that takes in deeper questions of value and society in America as revealed by present-day language use The essays that comprise the chapters are what might be called linguistic vignettes They call attention to points of grammar and style in contemporary American English especially in cases where the language is changing due to innovative usage including what older generations of speakers would consider errors in speech and writing

**The Logic of Markedness** Edwin L. Battistella, 1996-08-22 Theories of language espoused by linguists during much of this century have assumed that there is a hierarchy to the elements of language such that certain constructions rules and features are unmarked while others are marked play for example is unmarked or neutral while played or player is marked This opposition referred to as markedness is one of the concepts which both Chomskyan generative grammar and Jakobsonian structuralism appear to share yet which each tradition has treated differently Battistella studies the historical development of the concept of markedness in the Prague School structuralism of Roman Jakobson its importation into generative linguistics and its subsequent development within Chomsky s principles and parameters framework He traces how structuralist and generative linguistics have drawn on and expanded the notion of markedness both as a means of characterizing linguistic constructs and as a theory of the innate language faculty

Shapiro, Terrell Carver, Samuel Allen Chambers, 2012 Michael Shapiro has been one of the most important thinkers and writers over the past two decades whose work has been extremely influential in fields as varied as political theory international relations and cultural studies This collection contains his seminal writings on such topics as discourse culture and violence

Punctuations Michael J. Shapiro, 2019-11-22 In *Punctuations* Michael J. Shapiro examines how punctuation conceived not as a series of marks but as a metaphor for the ways in which artists engage with intelligibility opens pathways for thinking through the possibilities for oppositional politics. Drawing on Theodor Adorno, Alain Robbe-Grillet, and Roland Barthes, Shapiro demonstrates how punctuation's capacity to create unexpected rhythmic pacing makes it an ideal tool for writers, musicians, filmmakers, and artists to challenge structures of power. In works ranging from film scores and jazz compositions to literature, architecture, and photography, Shapiro shows how the use of punctuation reveals the contestability of dominant narratives in ways that prompt readers, viewers, and listeners to reflect on their acceptance of those narratives. Such uses of punctuation he theorizes offer models for disrupting structures of authority, thereby fostering the creation of alternative communities of sense from which to base political mobilization.

**Language and Society in South Asia** Michael C. Shapiro, Harold F. Schiffman, 2008-09-30 During the past two decades there has been a significant amount of research and publication concerning the sociolinguistics of South Asian languages. *Language and Society in South Asia* is the first major attempt to assess the impact of this new literature. It expounds the methodological and theoretical assumptions of sociolinguistic descriptions of South Asian languages and contrasts them with the assumptions of earlier characterizations of these languages. An important feature of this book is its detailed examination of numerous schools of linguistic analysis within which most past descriptive work on South Asian languages has been carried out. This is done in language accessible both to the professional linguist and to non-linguists interested in social aspects of language use in South Asia. Among the topics treated in this book are traditional taxonomies of South Asian languages, South Asia as a linguistic area, social dialectology, bi- and multilingualism in South Asia, pidginization, creolization, and South Asian English, ethnographic semantics, and the ethnography of speaking. The work also contains an extensive bibliography of the scholarly literature pertinent to the study of South Asian languages in their social contexts.

*The Peirce Seminar Papers* Michael Shapiro, 1998 Since the modern founding of sign theory by the American philosopher-scientist Charles Sanders Peirce (1839-1914), the field of semiotics has become increasingly prominent as a method of interdisciplinary research and study bridging the humanities, fine arts, and natural and social sciences. It is also truly international, with faculty representation at many universities, research institutes, and in scholarly societies throughout the world. This book offers a forum for applications of sign theory in its most developed and richest version, that of Charles Peirce.

**Peirce's Doctrine of Signs** Vincent M. Colapietro, Thomas M. Olshewsky, 2011-09-12

**The Peirce Seminar Papers** Michael Shapiro, 2002-12 Philosophers and linguists have come together for this volume to provide a glimpse of current thinking about language in a semiotic mode and of the analyses that result from applying the theory of signs of the American philosopher-scientist Charles Sanders Peirce (1839-1914) to subjects that Peirce himself did not explore in any depth. Contributors include Victor Friedman, Laura Janda, Tony Jappy, Din's Johansen, Dan Neshet, João Queiroz, João R. Thor, Michael Shapiro, and Nils Thelin.

**The Sense of Change** Michael Shapiro, 1991

Historical Linguistics Charles Jones, 2014-02-04 The contributors to this volume cover the international range of scholarship in the field of Historical Linguistics, as well as some of its major themes. The work and ideas they discuss are relevant not only to other aspects of Historical Linguistics but also to more general developments in linguistic theory. Along with Professor Jones' Introduction, their comments provide a major overview of Historical Linguistics that will be the reference point for its development for many years to come and form an important contribution to general theories of linguistic behaviour.

**Changing the Subject** Mary McClintock Fulkerson, 2001-01-25 The author shows the many ways in which women's scriptural performances are liberating. Shifting decisively from women's experience to discursive practices, she offers three sample readings of emancipatory discourses from diverse social locations that better display the variety of ways in which women are oppressed and resistant.

*Literature, Criticism, and the Theory of Signs* Victorino Tejera, 1995-03-16 Following Peirce in his non-reductive understanding of the theory of signs as a branch of aesthetics, this book reconceptualizes the processes of literary creation, appreciation, and reading in semiotic terms. Here is a carefully developed theory of what sort of criteria serve to distinguish apposite from inapposite readings of literary works of art. Given Peirce's triadic account of signification, it enlarges Aristotle's view of mimesis as expressive making into an understanding of literary works as deliberately designed sign systems belonging to Peirce's eighth class of signs. In parallel with Bakhtin's account of the dialogical nature of literary work and its success in exposing misreadings of Dostoyevsky, this work categorizes in precise theoretical terms what is wrong with the non-dialogical readings which treat Plato's dialogues as doctrinal tractates. As a study in literary theory, finally and on the basis of apt distinctions between exhibitively active and assertive judgments, this book re-demarcates and distinguishes the discipline of literary criticism from that of literary theory and both of these from the work of literary creation itself.

**Iconicity in Language** Raffaele Simone, 1995-01-01 Since the spectrum of possibilities in linguistic theory construction is much broader and more variegated than students of linguistics have perhaps been led to believe, the *Current Issues in Linguistic Theory* (CILT) series has been established in order to provide a forum for the presentation and discussion of linguistic opinions of scholars who do not necessarily accept the prevailing mode of thought in linguistic science. CILT is a theory-oriented series which welcomes contributions from scholars who have significant proposals to make towards the advancement of our understanding of language, its structure, functioning, and development. *Current Issues in Linguistic Theory* is especially designed by offering an alternative outlet for meaningful contributions to the current linguistic debate to furnish the community of linguists the diversity of opinion which a healthy discipline must have.

*Peirce's Approach to the Self* Vincent M. Colapietro, 1988-12-20 Based on a careful study of his unpublished manuscripts as well as his published work, this book explores Peirce's general theory of signs and the way in which Peirce himself used this theory to understand subjectivity. Peirce's views are presented not only in reference to important historical figures like James Saussure and contemporary figures like Eco and Kristeva, but also in reference to some of the central controversies regarding signs. Colapietro adopts as a strategy of interpretation Peirce's own view that ideas become clarified only in the course of debate.
